# INTRODUCTION

Brief description of your business/organization: A concise overview that highlights the key aspects of your business/organization, such as its nature, industry, products/services, and distinguishing features.

Purpose of creating the website or application: A succinct statement that communicates the objective behind developing the website or application. It should outline the specific goals or benefits the platform aims to achieve for its users.

Target group you want to reach: A brief description that identifies the specific demographic or audience you intend to reach with the website or application.

# OVERALL CONCEPT

Describe the overall concept and visual style you would envision for the website: Details about the desired tone, mood, and aesthetic elements that you believe would best represent the website's purpose and target audience.

Provide examples of existing websites or design elements that you like: Specific examples of existing websites or design elements that you find visually captivating and inspiring

Identify any special requirements that need to be considered when developing your website: This could include factors such as mobile responsiveness, e-commerce integration, multi-language support, or any other specific functionalities that are essential for the success of the website.

# PAGE STRUCTURE

Main sections on the website: Please identify the main sections or pages that you believe should be included on the website or application. This could include sections such as Home, About Us, Products/Services, Portfolio, Testimonials, Blog, Contact, or any other sections that are relevant to your business/organization.

Navigation and content organization: This could include recommendations on the placement and structure of the main navigation menu, sub-menus, dropdowns, or any other navigation elements that would enhance user experience and ensure easy access to different sections of the website. Additionally, if you have specific ideas on how to categorize and present the content within each section, please share them.

# CONTENT

Determine what content will be provided for each page on the website or application: Such may include text, photos, videos, or any other relevant elements. If you have specific content ready, please provide them. If not, please indicate the type of content that needs to be created for each page of the website or application.

# FUNCTIONALITY

Please outline specific functionalities such as contact forms, site search, online ordering, or any other features you deem important for the website: Furthermore, if you have any special requirements or considerations regarding functionality, please provide them. This could include integration with external systems or services, membership or login features, content management capabilities, or any other unique functionalities specific to your business or organization.

# DESIGN

Preferred colors, fonts, and overall design aesthetic: Please describe your preferred color scheme, font styles, and overall design aesthetic that you envision for your website. This will help us create a design that aligns with your brand identity and resonates with your target audience.

Logo and graphic elements: If you have a logo or any other graphic elements that should be incorporated into the website, please indicate them. Providing these assets will ensure that we maintain consistency with your existing branding materials.

# TECHNICAL REQUIREMENTS

Hosting requirements: If you have any specific hosting requirements, please list them. For example, if you prefer a specific hosting provider or have specific server configuration needs, please provide those details.

Domain name requirements: If you have any specific requirements for your domain name, such as a preferred domain extension (.com, .org, .net, etc.) or any specific domain name suggestions, please let us know.

# **TIMELINE**

Desired completion date for the project: Indicate the date by which you would like the entire project to be completed.

Important points for phase completion: If there are specific milestones or phases within the project that have deadlines or important points when they need to be completed, please outline them. This could include key deliverables or stages that require your review, feedback, or approval.

# BUDGET

Budget for creating the website or application: Indicate the budget you have allocated for the development of the website or application. This will help us understand any financial constraints and work within the specified budget to propose suitable solutions.

Constraints or limitations to consider: If there are any specific constraints or limitations that need to be taken into account during the development process, please outline them. This could include factors such as time constraints, resource limitations, or any technical or functional restrictions.

## OTHER REQUIREMENTS

Please share any additional requirements or wishes that are important to you but couldn't be accommodated within the constraints of the previous sections. These could be specific design preferences, unique functionalities, integration with certain systems or platforms, or any other important considerations that you would like to emphasize.

Providing these additional details will help us better understand your expectations and ensure that the development of the website meets your specific requirements and aspirations.
